- 6 star rank on hacker rank in Python. I am now in the top 1% of the community.

## Recent Projects

### E-CART

📅 April 2023

📍 Pune

• E-cart is an e-commerce web app built using the Django framework and in HTML, CSS, and JavaScript.

### WEATHER APP

• I built a Weather prediction webapp using the Django framework and open weather API. It contains authentication features such as signing, login, logout. It displays the weather of the particular city.

### DEPLOYING STATIC WEBSITE ON AWS

F13 TECHNOLOGIES

📅 Jan 2023

📍 Delhi

• This project is completed during the internship. Here we have built a static website and deployed it over the internet with the help of AWS S3. AWS S3 comes with the ability to host a static website, we can integrate with different services.

### BUILDING A CHAT-BOT USING AWS LEX

F13 TECHNOLOGIES

📅 Feb 2023

📍 Delhi

• In this project we have made one hotel-booking chatbot on AWS Lex with AWS lambda to make this system server-less and easy to operate

### DEPLOYING WINDOWS VIRTUAL MACHINE

F13 TECHNOLOGIES

📅 Feb 2023

📍 Delhi

• Deploy Windows Virtual Machine with RDP protocol for the users who do not have an AWS account but want to use AWS virtual machine on a remote desktop.
